Comment
I like that we get to learn daylight used softwares.
I liked learning how to use stata and colab and learning ways to analyze data. i enjoyed working on the project.
My professors passion
It gave me an insight of the Supply Chain industry and since I am taking statistics it helped more with this course.
His attitude and help
The Professor's understanding and adaptability based on the students.
Open style teaching and very flexible in allocating students resources.
Chen was quick to respond to my emails and questions on WhatsApp! He started off the semester with what we were interested in and tailored the course to our interests! Such an amazing teacher, this was the first time I finally understood certain topics and it's because of the way he broke down each difficult topic and took us through it!

If you were teaching this course, what would you do differently?

Comment
I would include more softwares if posibble.
I think since it was a summer course everything was fast paced which is to be expected. if i could do it again I would take it over a regular semester if the evening class had been offered.

Nothing everything was great
The professor didn't follow the strict chapter by chapter style of teaching, and rather "freestyled" it. I learned either way but it's just harder to keep track of my notes for the latter style.
The only time I see myself teaching this course is as Prof Zhou’s TA.

In what ways, if any, has this course or the instructor Chenhao Zhou encouraged your intellectual growth and progress?

These comments are unique to the instructor Chenhao Zhou.

Comment
Professor Chen encouraged us to use tools that will continue to be beneficial for demand planning and analyzing data long after we complete this course and for future use. He was able to answer all questions and took the time to help anyone who needed it.

Yes
The professor was very encouraging when making sure we participated so we can see where we need help in order to do well in the final. His assignments were of great help to learn and overall the professor was always on top of his class.
encourage independent thinking and real life application of the course by constantly reiterating how demand planning and fulfillment affect businesses that we are involved in and affect global supply chains.
This professors teaching style was extraordinary, he explained super difficult concepts in a way a child would, definitely a professor id recommend to people, even those who dont take supply chain. Such professors come handful in academic journey and I was very lucky to have him.
